

High Level Alarm

Product Summary

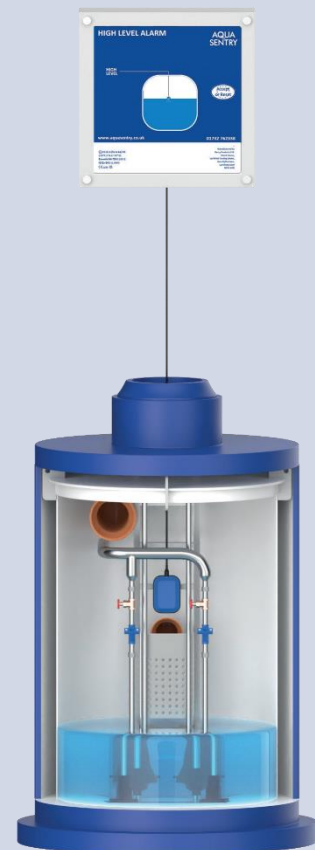

Specifically designed for new build sites or locations with readily available mains supply, this unit ensures quick, cost-effective installation. The alarm system provides early warnings, allowing timely corrective actions to maintain the safe and efficient operation of tanks. This helps to prevent overflows and protect watercourses from pollution, avoiding costly fines and clean up expenses.

Features

The unit has an easy to operate, single button interface, with an alarm LED and an internal beeper.

Specifications

- Mains Powered: 230VAC
- Input: 1 Probe
- Operating Temperature -20°C to +50°C
- Enclosure Size: 100mm x 100mm x 80mm
- Designed to comply with EN1825
